

## Best FCC Approved Call Blocker in the Market for Those Getting Bombarded by Robocalls & Unwanted Calls

*FCC Approved T-Lock Call Blocker Proven to be Highly Effective to Block Robocalls and/or any Unwanted Calls*

Miami, FL, September 13, 2014 — Is your phone constantly interrupted by automated announcements (Robocalls), telemarketing sales calls, and other unwanted calls? You are not alone! This is why HQTelecom is offering a [call blocker](#) product (model N2) that can block up to 1,500 phone calls and fax numbers to help consumers stop the annoying phone calls.

In the US, even if you register your phone number with the 'Do Not Call' list (a US government sponsored program), you will not be protected against those annoying calls. "We receive several e-mails and phone calls daily from homeowners seeking for effective solutions to protect their phone lines against unwanted calls, especially politician's pre-recorded announcements and messages." says Alfredo Purrinos, former NASA engineer and President of Hi Q Telecom Inc. "Many complain about getting hammered with several unwanted phone calls each day, even though they are on the 'Do Not Call' list".

HQTelecom's T-Lock [call blocker](#) device is designed with the capacity to block up to 1,500 phone numbers hence meeting the needs of today's telemarketing practices. Since most companies using automated telemarketing services are constantly changing their phone numbers, you need a call blocker device with a large capacity that can block several hundred numbers. Other products presently available in the market can only block about 100 numbers or less.

This modern Incoming call blocker is an effective and easy way for consumers to block unwanted telephone calls. It is an extremely user-friendly device which allow users to easily block calls from phone numbers and faxes by simply pressing a 'Blacklist' button. It is also line powered, which mean that it does not require batteries or an external power supply, and uses a technology called EEPROM

(Erasable Electronically Programmable Read Only Memory) which allows it to retain the stored blocked numbers even if you disconnect it from the phone line.

About the Company:
