

## NEW PRODUCT RELEASE: LANDLINE CALL BLOCKER WITH LARGE DISPLAY, BLUE BACKLIGHTING, DUAL POWER, LED CALL ALERT

Best Landline Call Blocker in the Market with Extra Large LCD Display, Blue Backlight, Dual Power, and incoming Call Alert LED light

Miami, FL, November 13, 2014 — Are you tired of getting non-stop annoying phone calls? If so, they are not alone! US consumers are getting bombarded with an increasing number of unsolicited telemarketing activities, including illegal robocalls, and several phone scams and frauds.

The [Landline Call Blocker](#) model (L09-XL) just released by [HQTelecom.com](#) offers unique features that makes it a great solution to block unwanted calls. These features include an extra large LCD display (5" x 3") and blue backlighting to make it easier to read incoming phone numbers. This model also features dual power sources (AC & batteries) which eliminates many of the power related glitches found in many other call blockers available in the market. This product can block up to 1,000 unwanted phone numbers.

"It's very rewarding to be able to help homeowners restore peace and quiet in their homes" says Alfredo Purrinos, former NASA engineer and factory's sole distributor for the T-Lock Call Blocker product in the USA.

In the United States, even if you register your phone number with the government sponsored 'Do Not Call list', consumers still continue to receive unwanted calls. According to the Federal Trade Commission (FTC), the number of phone-related fraud and scams complains have increased 2600% in the last 10 years (from 150,000 to 4,000,000).

The Landline [Call Blocker](#) the best solution available in the market because it offers a large blocking capacity, an easy to read display, and dual power source. Please refer to <http://hqtelecom.com/callblocker> for more details.
