### **The procedure for connecting the Bluetooth headset to a mobile phone (Pairing).**

#### **STEP 1**

Press the HIQ-L03 headset's Multifunction Key for about 4 seconds. This will turn the headset ON and a BLUE light will begin to flash. To initiate the Pairing Mode continue pressing the Multifunction Key until alternating RED and BLUE lights begin to flash. This indicates the headset is now in Pairing Mode (The headset will start searching for other Bluetooth enabled devices).

#### **STEP 2**

Open your Mobile Phone's Bluetooth function and search for other Bluetooth devices. You should see "L03" show in the search results.

#### **STEP 3**

Press the HIQ-L03 Headset's Multifunction key to make the connection. When the connection is successful the BLUE light will begin to flash.

#### **STEP 3**

The HIQ-L03 headset battery working time is approx. 4-6 hours. The standby time is about 200 hours when fully charged. The actual working time and standby time will depend on the type of mobile device, the cellphone settings, and environmental conditions.

**Note** - Pairing with a smart Bluetooth-enabled device only needs to be done one time.

## How to connect with two (2) mobile phones

### STEP 1

Press the HIQ-L03 headset's Multifunction Key for about 4 seconds. This will turn the headset ON and the BLUE light will begin to flash. Continue pressing until the RED/BLUE lights flash alternately. This will indicate the headset is in Pairing Mode.

Open the Bluetooth function on the **1st Mobile phone** and search for the HIQ-L03 headset. When it appears in the search results on the phone, press the Multifunction Key on the headset to complete the **1<sup>st</sup> connection**.

Press the headset's Multifunction Key until a RED light appears. This will turn OFF the headset and the **1st Mobile Phone's** Bluetooth function.

### STEP 2

Turn the HIQ-L03 headset ON again. Place the headset in Pairing Mode by pressing the Multifunction Key until you get flashing RED/BLUE lights.

Open the Bluetooth function on the **2nd Mobile Phone** and search for the HIQ-L03 headset. Press the Multifunction Key on the headset to complete the 2<sup>nd</sup> connection.

## Charging and maintaining the Bluetooth headset

### STEP 1

Insert the recharging cable into the Headset Charge Port and switch on the power.

A RED light will be ON while the battery is charging. Battery charging time is approx. 2 hours.

When the battery is fully charged a BLUE light will be ON.

### STEP 2

During use, when the battery is getting low, the HIQ-L03 headset will prompt the user with a "Beep Beep" sound. This means the battery needs to be charged immediately.

### STEP 3

The HIQ-L03 headset battery working time is approx. 4-6 hours. The standby time is about 200 hours when fully charged. The actual working time and standby time will differ depending on the type of mobile device, different cellphone settings and differing environmental conditions.

## Taking Photographs

### STEP 1

Ensure the HIQ-L03 Headset is switched on and connected to your mobile device. Place your mobile device into camera mode (the way you would normally take pictures with your mobile device)

### STEP 2

Point your camera at your photographic subject.

### STEP 3

Press the + volume button **twice** to take a photo. Your mobile device will take photographs.
