- Instructions manual

## **Charging the battery on the RockDoc® Speaker**

Your RockDoc® Speaker comes from the factory equipped with a 3.7V Lithium battery (model BL-5B).

- This battery is installed in the battery compartment located in the bottom of the RockDoc® Speaker.
- To charge the battery, connect the multi-purpose cable on Micro USB LINE IN DC-5V socket on your RockDoc® Speaker, and the other end (USB plug) on a PC, laptop, etc. You can also connect the USB plug into a AC/DC power adapter 5V, 1A (not included).
- The LED light on the RockDoc® Speaker will indicate the following:
  - When RockDoc® is turned ON, the LED light is BLUE.
  - When charging and RockDoc® is turned OFF, light is RED.
  - When charging and RockDoc® is turned ON, light is PINK.
  - When charging is complete, RED light turns OFF.

Note: The first time you are charging the battery, it may take up to 8 hours to fully charge.

## **Pairing your Bluetooth device with the RockDoc® Speaker**

You can pair the RockDoc® speaker with most Bluetooth-enabled devices (such as smartphones, PCs, tablets, PDAs, and many others). Once your RockDoc® speaker is paired with a Bluetooth-enabled device, you can play music on your Bluetooth-enabled device and listen on the RockDoc® speaker.

- Turn the RockDoc® speaker “ON” (Note: You must remove your MicroSD memory card, if installed).
- Press the “MODE” button twice (a “chime” sound will be heard)

- Turn Bluetooth “ON” on your Bluetooth-enabled device and/or start searching for Bluetooth devices.
- Look for “RockDoc” in the Bluetooth-enabled devices list. You may have to refresh the list.
- Select “RockDoc” to pair your device and the speaker. You may need to enter the code “0000”. Pairing should complete after selecting RockDoc and/or entering code.
- Now just play music through your Bluetooth-enabled device as you normally would and music will play through your RockDoc® speaker.

### **Using the Micro SD/TF Slot:**

- When using the Micro SD/TF slot you must insert a Micro SD memory card (not included) with pre-loaded MP3 formatted songs.
- The Micro SD/TF slot can hold up to 64GB Micro SD memory cards.
- The Micro SD memory card will only insert in one way, connectors must be facing up, and it will click into place when fully inserted.
- There is no internal memory available on the RockDoc® device.

### **Using the Buttons on the RockDoc® Speaker:**

- MODE: Pressing the “MODE” button will toggle between Line In, Micro SD, and Bluetooth.
  - ▶/■ Play/Pause/Stop song in progress
  - VOL: Toggle between volume and song selection
  - ◀/V- : Previous Song/Rewind/Volume Down
  - V+/▶: Next Song/Fast Forward/Volume Up
  - The default mode is Line In. If you insert a Micro SD memory card, it will automatically begin to play music.
  - To change volume first click and release the VOL button. Next, press ◀/V- for volume down, or V+/▶ for volume up. In order to change back to song selection, click and release the VOL button again.
  - To change the song simply click and release the ◀/V- for previous song or V+/▶ for next song
